

# The Digital Pen

## What is a Digital Pen?

The digital pen resembles your standard ball-point pen. It can be used like a normal pen and even uses ink, but unlike other pens, the digital pen has a very tiny camera stored inside. This camera stores your hand movements and saves your notes – digitally. That's every word, signature, doodle, sketch or scribble converted to a digital page.

## Why do you need it?

Whether you're an engineer, healthcare worker, surveyor, training officer or a delivery driver, working in the field means you need real-time data that is accurate, and can be sent back to base quickly. Methods such as posting and faxing, are an unnecessary waste of your most important resources – time and money. The digital pen speeds up the process dramatically, transmitting data in a matter of minutes, not days. And without big changes to working practices or capital outlay.

## What can you do?

**Design your own forms:** With the digital pen, you'll find all the familiar and recognisable tools you'd expect from applications such as Microsoft Word or PowerPoint. Drag and drop logos, commonly used fields, tick boxes, and even pdfs of existing forms into a blank grid. Once you have finished designing your form, it will be automatically checked and validated for you – including the addition of the Anoto dot matrix pattern, that turns ordinary paper in digital paper.

**Choose the devices you use:** You can use digital pens to create hard copies – avoiding issues with un-readable signatures, battery life and network coverage. Or you may prefer smartphones and tablets to suit your environment and application. You may even opt for a combination of different devices. It really is up to you. We offer freedom and flexibility, and if you can't decide, we are more than happy to offer advice.

## Key features:

- Create your own business work-flow, design and publish forms
- Write on printed forms with a digital pen or populate forms on a tablet
- Integrate data into your business
- Review and manage your captured data in real time
- Captured data sent via a mobile device back to HQ

# The Digital Pen

How it works...

## Design:

- ✓ Simple 'drag and drop' digital form design – font size and type, colour, fill, shapes etc
- ✓ Quick, simple, intuitive step-by-step process
- ✓ Pre-defined fields available like customer name, address, contact numbers, notes, signature, sketch box and attach photo
- ✓ Tick boxes to reduce writing and the chances of mistakes
- ✓ Or radio buttons and drop down menus for electronic forms
- ✓ Import and edit pdfs of existing forms
- ✓ Automatic validation to point out any mistakes
- ✓ Fully branded forms to your own specification
- ✓ Print on a desktop printer, send to a print shop or publish as an electronic form

## Manage:

- ✓ Everything under your control
- ✓ Password-protected login to secure Inkworks website
- ✓ Create permissions and privileges for individuals and user groups
- ✓ Design your own workflows
- ✓ Choose to receive pdf images, data files or both
- ✓ Choose delivery via email, ftp site or direct to your back-end system
- ✓ See a graphical dashboard of all your most recent forms received, processed and sent

## Capture:

- ✓ Users write with digital pens, make sketches and attach images in the field
- ✓ Or capture data on tablets or smartphones
- ✓ Instant validation in the field of critical information (e.g. customer or patient number)
- ✓ Rapid data transmission in minutes not days
- ✓ Or dock the digital pen when back in the office

## Integrate

- ✓ Review incoming forms to check and validate
- ✓ Compare the pen strokes actually written with converted text
- ✓ Use the play facility to see how the form was filled out in real time
- ✓ Integrate completed forms, photographs and sketches into your business systems
- ✓ Access to any and all of your forms, whenever you want

- ✓ Easy to use with little or no training required
- ✓ Limited IT support needed
- ✓ Increased security for company data and user personal
- ✓ Interaction with your customer's customer is more natural
- ✓ Capture and use real time data quickly
- ✓ Paper copy held by customer if required
- ✓ No scanning, faxing, posting or rekeying info
- ✓ Crystal clear pdfs
- ✓ Low implantation cost, fast return on investment

As little as

**£20**

per user,  
per month\*

+ We'll  
manage for it  
for you.

## How much could you save?

Every business is different. And for that reason, you'll receive a free "return on investment" audit. An expert will do all the hard work for you, and help you make the business case. Taking into consideration the true cost of your current operations; capturing and processing data from the field, sending it back to base and then rekeying it. You'll receive a calculation of the time that you can save on admin and free up to reinvest. You'll also receive the value of savings you'll make on paper, mileage, and other costs. With all of these factors taken into account, you'll also receive benefits of greater data security, improved customer service and faster cash flow.

## Any questions?

If you have any questions or would like more information, please do not hesitate to get in touch. Our friendly team are always happy to help. There are also some great online help panels on our partner's website if you're a little stuck: [www.destinywireless.com](http://www.destinywireless.com).
